BEFORE THE  
FEDERAL COMMUNICATIONS COMMISSION  
Washington, D.C. 20554**

**August 22, 2005**

**In The Matter of**

DOCKET FILE COPY ORIGINAL

**Creation of a Low Power Radio Service.**

**MM Docket No. 99-25**

**These are the comments of low power radio station K E T I 99.5 MHZ  
IN VICTORIA, TEXAS.**

**KETI wishes to request changes in the low power rules to allow for a  
MOVE OF A LOW POWER FM STATION to a maximum of 10  
kilometers from original site. KETI operation has been frustrated by  
twin demons of location limitations. The city of Victoria, Texas now  
does not permit any new radio towers over a height of an existing  
rooftop on site of slightly more than 10 feet. There is no feasible site for  
either tower and the transmitting antenna location exists in the area.**

**A combined operation is possible at the licensed v tower site of KTXN,  
which is some four miles from the site in its construction permit. A  
move to this site has been frustrated by the maximum move rules of the  
docket of the MM 99-25.**
